

Financial Services Insurance

The Valoores Insurance in'Data Foundation is the only data model you need to streamline your business.

**You Have The Value
We Bring You The Added
Value**

Key Benefits:

- Data model is physicalized, pre-built, and readily deployable
- Complete, accurate and timely data
- Reduce the initial effort involved during data warehouse development with advanced model mapping.

Key Features:

- Capture data from multiple source systems and business processes across multiple lines of business.
- Capture data at the most granular event level

■ The basis of the Valoores Insurance in'Data Foundation is our state-of-the-art data model. Unlike competitor data model solutions, Valoores' data model is physicalized, built in-house, and readily deployable. In addition, our data model can be used in sourcing and provisioning complete, accurate timely data, providing full enterprise coverage across multiple lines of business such as: life, non-life, health and re-insurance.

■ Data Sourcing and Provisioning

The Valoores data model provides your business with a comprehensive solution that enables you to capture data from multiple sources across systems and business processes (policy, finance, claims and actuarial systems) across insurance lines of business: Life, Non-Life, Health and Re-Insurance.

■ The Valoores in'Data Foundation solution allows the capture of data at the most granular level covering both financial and non-financial measures. In addition, our solution has detailed structures for your policies, actuarial information, economic scenarios and reference data related to your product, organization and chart of accounts. Our model maps each of your attributes to its analytical end uses. Therefore, considerably reducing the initial effort involved during data warehousing and development by focusing on mapping source data to end uses for your business.

Valoores was founded in 2011 by business intelligence experts to make raw business data meaningful and understandable for all people in all sorts of industries. It was built on the solid foundation of knowledge and experience of business intelligence and data warehousing which would ultimately bring our clients strides ahead in their competitive markets.
