- Designed for intuitive use, ensuring easy adoption across all levels.
- Supports diverse data types and breaks down information into scalable components for optimal performance.
- Leverages powerful definitions to enhance operational efficiency and decision-making.
- Offers a homogeneous platform with a consolidated dashboard for all services, simplifying management.
- Accelerates transaction processing, improving both speed and quality.
- Delivers a unified solution that ensures seamless business operations.
- Incorporates advanced safeguards for effective disaster recovery and continuity planning.

Key Features:

- Facilitates thorough business requirement gathering and gap analysis for informed decision-making.
- Ensures a secure and scalable network to support critical operations.
- Implements strict data cleansing and security protocols, including privilege and credential management.
- Enables swift, simultaneous implementation of new services for increased agility.
- Streamlines daily technical operations and transactions for improved reliability.

VALOORES Services Overview

Money Transfer: Facilitates seamless domestic money transfers through a user-friendly intra-transfer application, alongside international transactions via integration with Western Union.

Bill Payment: This service enables customers to settle landline, mobile

post-paid, and mobile pre-paid bills, as well as parking tickets, at any authorized sub-agent location.

Online Payment

Provides an electronic payment solution, including physical and electronic mobile top-ups.

Comprehensive Modules for Every Need

The VALOORES in payment solution:

- ✓ Equips financial institutions with a structured approach to documenting requirements through a detailed specifications document (DSS), encompassing business analysis, gap diagnostics, and appropriate solutions.

- ✓ Combines user-friendly technology with essential technical elements (e.g., logs, security) to ensure a robust operating environment.

- ✓ Provides firewalls, backend and front end user privileges for improved access and security standards, with administrator authorizations.

- ✓ integrates multiple applications, ensuring unified information across various repositories, thereby minimizing redundancy and erroneous data.

- ✓ VALOORES enhances operational efficiency by synchronizing real-time results across different services, such as Mechanic and Park Meter operations.
