

Jean Marc Trad

JUNIOR IT

Bouar, Lebanon | 81760690 | jeanmarctrad@gmail.com

Experience

Potech | SOC T1 Analyst Intern

Jun 2024 - Aug 2024

- Monitored and analyzed security alerts to identify and respond to potential threats
- Assisted in incident response and escalated unresolved issues to Tier 2 support.
- Used various tools for threat investigation and remote system management.
- Prepared detailed reports for clients and maintained effective communication with the team.

Education

Holy Spirit University of Kaslik, BS in Information Technology

2022-2025

- Relevant Skills:
 - Programming Languages: Proficient in Java, C++ and JS.
 - Database Management: Skilled in designing, managing, and querying databases.
 - Networking and Hardware: Understanding of computer hardware, network configurations, and system maintenance.
 - Web Development: Experience building responsive websites using HTML, CSS and JS.

Projects

CyberSolutions – Cybersecurity Toolkit Platform

- Developed a cybersecurity web platform offering a suite of tools for security analysis and education.
- Integrated a network scanner using Nmap with custom parsing of scan results to display open ports, services, and potential vulnerabilities.
- Implemented a vulnerability scanner using OWASP ZAP API for automated security testing.
- Used Docker to create isolated virtual environments unique to each user for secure and sandboxed tool execution.

Certifications

- Ethical Hacking Essentials (EHE) – EC Council.
- Penetration Testing, Threat Hunting, and Cryptography – IBM
- Intro to python for Cybersecurity – InfoSec
- Intro to Cybersecurity – Cisco

Skills & abilities

- Problem-Solving.
- Cybersecurity Awareness.
- Hardware Maintenance and troubleshooting.
- Adaptability.
- Time Management.
